

GRAND  MEADOWS™

SPECIALIZING IN NUTRITIONAL SUPPLEMENTS

Dear Customer,

Effective May 1, 2008

We, like most companies, are struggling to maintain current prices while faced with significant increases in our costs. Costs have risen 6 times on our buckets alone which are a petroleum based material. Freight charges along with raw materials have also greatly impacted us. Biotin has more than doubled and Vitamin E has more than tripled.

No company can carry such increase in costs for long. We've tried to hold the pricing as long as we can but find we must reluctantly pass some of the price increase along to you. Our products containing Biotin and Vitamin E in particular must have their prices adjusted. We are limiting increases to 20% or less but our costs have increased 38-41%. We may have to have a second increase in the future to offset any further increase in costs. If commodity prices come down we may not have to implement any further price increases.

Rest assured that Grand Meadow will never compromise the quality of our products to cut costs.

The products that are affected are Grand Complete, Grand Hoof, Grand Hoof Pellets, and Grand Vite.

Please contact us if you have any questions. Thank You for your confidence in our products and your loyalty.

Nick Hartog, President
Grand Meadows, Inc.
