Five minutes to a healthier horse

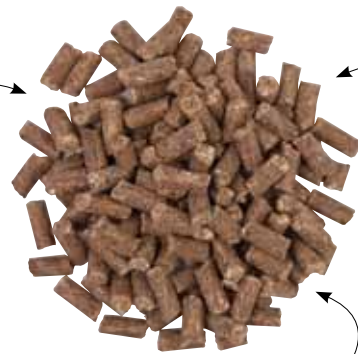

SmartControl IR®

Is your horse overweight with sore feet or abnormal fat deposits in the crest of the neck, over the tail and behind the shoulders? These could be signs of insulin resistance, a condition that is part of Equine Metabolic Syndrome, and frequently associated with obesity. If not properly managed, obesity and its resulting health problems can have serious complications.

What makes it smarter?

Chromium and Magnesium, minerals essential to the proper function of insulin

Vitamin E and other antioxidants to help manage the oxidative stress associated with insulin resistance

Cinnamon and other herbs provide targeted metabolic support

Is it the solution for my horse?

SmartControl IR is designed to help manage insulin resistance. This breakthrough formula supports a healthy metabolism by providing a targeted selection of antioxidants, nutrients and herbs. These include the minerals Chromium, which helps insulin regulate blood sugar, and Magnesium, which is essential for proper glucose utilization and insulin signaling. SmartControl IR also contains Cinnamon, for supporting healthy blood sugar levels, and plant adaptogens like Siberian Ginseng to help the body cope with stress. These tasty beet pulp-based pellets are perfect for horses on little to no grain.

Real Results

IT ACTUALLY WORKED! *Within a month there was a noticeable difference, and after two months my trainer pronounced him at his 'perfect weight.'*
– TE from Fairplay, CO
