

HOW TO GET THE MOST OUT OF HOOFLEX® MAGIC CUSHION™

STEP 1

Thoroughly clean all areas of the hoof using a hoof pick and a stiff or wire brush if necessary. Magic Cushion™ must come in direct contact with the sole to be effective.

STEP 2

Using gloves or an applicator, apply an amount of hoof packing to the sole sufficient enough to cover the entire sole and sulci of the frog ½ inch in depth.

STEP 3 (RECOMMENDED)

For optimal results, cut a suitable shape from a brown paper bag or similar material. Wrap the foot to keep the hoof packing in place and to allow the liquid ingredients to be absorbed into the sole.

STEP 4 (RECOMMENDED)

Hold in place with a suitable wrap. If wrapping over the coronary band, make sure there is adequate padding in place for protection. Replace every 24-48 hours.

Magic Cushion™ can also be packed under a pad for the duration of the shoeing cycle. Ask your farrier!
