

## The SmartPak™ Pharmacy Equine Product Information Sheet

### Legend® and Legend® Multi Dose Injectable Solution

**Common Drug Name** – Hyaluronate sodium

**How Supplied by SmartPak** – Legend is supplied in 4ml (40mg) vials for intravenous injection. Legend Multi Dose is supplied in 20ml vials. Each ml contains 10mg Hyaluronate sodium.

**Category** – Hyaluronate sodium is a glycosaminoglycan.

**Caution** - Federal law restricts this drug to use by or on the order of a licensed veterinarian.

**Indications (Uses)** – Legend is indicated in the treatment of joint dysfunction of the carpus or fetlock in horses due to non-infectious synovitis associated with equine osteoarthritis.

**Dosage and Administration** – For intravenous administration, use aseptic technique and inject slowly into the jugular vein 4ml (40mg). Treatment may be repeated at weekly intervals for a total of three treatments. Horses should be given stall rest after treatment before gradually resuming normal activity. Discard any unused portion of the drug and the empty vial after opening.

**Contraindications** – There are no known contraindications for the use of Legend in horses.

**Human Warning** – Not for human use. Keep out of reach of children.

**Warning** – The 4ml (40mg) vial is not for intra-articular use. Do not use in horses intended for human consumption.

**Precautions** – Radiographic evaluation should be carried out in cases of acute lameness to ensure that the joint is free from serious fractures. The safety of Legend has not been evaluated in breeding stallions or in breeding, pregnant or lactating mares.

**Adverse Reactions (Side Effects)** – No local or systemic side effects were observed in the field studies using Legend.

**Storage Conditions:** Do not store above 104F.
