

# PROVIABLE<sup>®</sup>-EQ

**For Horses**

**NATURALLY  
REESTABLISHING  
INTESTINAL HEALTH**

FROM THE MAKERS OF  
**COSEQUIN<sup>®</sup>**

## Keeping your horse's hindgut healthy can be a challenge when so many factors contribute to imbalances in the hindgut's microfloral population

PROVIABLE®EQ IS A DIGESTIVE AID CONTAINING SACCHAROMYCES YEAST SPECIES PLUS PREBIOTICS TO ENCOURAGE NORMAL GASTROINTESTINAL FUNCTION AND HEALTH

CAN BE USED CONTINUOUSLY OR AS NEEDED TO MAINTAIN HINDGUT HEALTH DURING TIMES OF STRESS OR DIGESTIVE UPSET

### **What is Provable-EQ?**

Provable-EQ for horses is a digestive supplement designed to help reestablish and maintain intestinal health naturally.

### **When would I use the Provable-EQ Paste?**

Provable-EQ Paste is unique because it contains two yeast species *Saccharomyces boulardii*<sup>▲</sup> and *Saccharomyces cerevisiae*. The easy-to-administer paste helps reestablish healthy intestinal microflora after imbalances have occurred. A placebo-controlled study (Desrochers AM et al. J Am Vet Med Assoc 2005;227:954-959) showed severity and duration of diarrhea were significantly less in horses administered *Saccharomyces boulardii*. Research in other species suggests the ingredients in Provable-EQ Paste also might be of benefit after intestinal surgery to help support intestinal function.

### **When would I use the Provable-EQ Powder?**

Provable-EQ Powder contains *Saccharomyces cerevisiae* and is administered once a day to help support healthy gut flora and maintain appetite. The powder also helps protect against more long-term imbalances caused by events such as starting a new diet or using antibiotics for extended periods of time.

### **What are prebiotics?**

Prebiotics are selectively fermented carbohydrates that can help stabilize healthy microfloral populations during dietary stress and assist with digestion. Both Provable-EQ Paste and Powder contain prebiotics.

### **What makes Provable-EQ different from other brands?**

Provable-EQ contains a source of live (viable) naturally occurring microorganisms with a guaranteed analysis of colony forming units (CFU's, a measure of yeast cell numbers) present on the label, while other products on the market often do not list the number of organisms present or, when they do, may not meet label claim.

<sup>▲</sup>*Saccharomyces boulardii* is a subtype of *Saccharomyces cerevisiae*. Its full taxonomic name is *Saccharomyces cerevisiae* var. *boulardii*.

Count on  
Provable®-EQ  
to support  
your horse's  
intestinal  
health!

Available in two formulations:  
Provable-EQ Paste, available in Carton of 6 tubes,  
and Provable-EQ Powder 600g container.
