

SmartDigest® Ultra and ColiCare™

Why you should be concerned about colic

Colic is responsible for more deaths in horses than any other disease. A sudden change in your horse's lifestyle or diet, such as different hay or grain, increased stall time, adjustment in activity level, or even dehydration can lead to colic. **In fact, research has shown that hay changes alone can increase a horse's risk of colic by 10 times.** Luckily, studies also suggest there are things you can do to help reduce your horse's risk.

A healthy digestive system with SmartDigest® Ultra

SmartDigest Ultra is specially designed to **help your horse manage digestive stress** caused by hay fluctuations, training, travel and more. This innovative formula provides high levels of specialized ingredients to help keep your horse's digestive tract healthy and balanced. The clinically studied ingredients in SmartDigest Ultra include: prebiotics proven to reduce disruption in the cecum and colon and inhibit the absorption of harmful bacteria in the hindgut; yeast shown to improve fiber digestion and assist the beneficial bacteria of the cecum in adjusting to feed changes; enzymes demonstrated to increase the proper digestion of starch in the foregut. SmartDigest Ultra provides unparalleled GI protection for every horse, from the high level performance horse to the retiree and everything in between.

Backed by \$7500 of colic surgery reimbursement with ColiCare™

We're so confident that SmartDigest Ultra will help keep your horse's digestive system healthy that we've backed it with our colic surgery reimbursement program, ColiCare. Horses who receive SmartDigest Ultra in SmartPaks™ may be eligible for this unique benefit, which provides \$7500 of lifetime coverage toward colic surgery. With SmartDigest Ultra and ColiCare, you can sleep soundly knowing your horse has the best digestive product *and* the best wellness program in his corner.
